

## THE ASSESSMENT TOOL

---

### **A tool to describe the available services for the management of hazardous and harmful alcohol consumption<sup>1</sup> at the country or regional level**

---

The aim of this instrument is to develop a comprehensive tool that can be used to describe the available services for the management of hazardous and harmful alcohol consumption at the country or regional level. It is not a tool that will be completed in one day or at one time; rather it is a tool that will be gradually completed over time, building up a detailed and sophisticated profile of the management of hazardous and harmful alcohol consumption. The aim of the tool is to identify currently what is going on, and to identify deficiencies or areas in the country that need further work and strengthening.

Within each country or region, it is suggested that one person is nominated for ensuring that the tool is completed and returned.

It is suggested that the tool is completed by country or regional coalitions or partnerships that are set up to support the development of services for managing hazardous and harmful alcohol consumption. If no such coalition or partnership exists, it is suggested that a coalition is formed, with its first task to complete the tool. The tool can also be completed through meetings with individual experts. The tool can be divided into separate sections for different experts to complete. Certain questions require opinion or expert judgement; in this case, consensus can be achieved at meetings of coalitions or partnerships.

The tool:

- Provides a baseline description of services for managing hazardous and harmful alcohol consumption, identifying areas where services may require development or strengthening;
- Provides a mechanism for monitoring service provision over time;
- Allows sharing of information and examples of practice; and
- Provides a mechanism for coalitions or partnerships to discuss and have a shared view on services for managing hazardous and harmful alcohol consumption.

---

<sup>1</sup> Hazardous alcohol consumption is a level of consumption or pattern of drinking that is likely to result in harm should present drinking habits persist. Harmful drinking is defined as 'a pattern of drinking that causes damage to health, either physical or mental'.

## Completion of the tool<sup>2</sup>

It is preferable that you complete the tool electronically as a word document.

Within the tool there are text boxes. Just place the cursor in the text box and type. (Pressing the tab key moves you from box to box). You can also cut text from other documents and paste them into the text boxes. There are no limits to the size of the text boxes.

Within the tool, there are check boxes. Just place the cursor in the check box that you want to mark and left click the mouse. If you want to correct the check box, just left click the mouse again.

Where you see **[Document Reference]** in the Assessment Tool, please provide the information listed below using this PHEPA Document Reference Template, one for each document. Please copy the closed blank form and then save the completed form with a file name in the format: PHEPAquestionnumbercountry.doc (no spaces). Example: PHEPA22.1Catalonia.doc. At the point where you see the relevant **[Document Reference]** in the tool, please insert the file name of this document.

Where you see **[Organization Reference]** in the Assessment Tool, please provide the information listed below using this PHEPA Organization Reference Template, one for each organization. Please copy the closed blank form and save this completed form with a file name in the format: PHEPAquestionnumbercountry.doc (no spaces). Example: PHEPA3.1Catalonia.doc. At the point in the tool where you see the relevant **[Organization Reference]** in the questionnaire, please insert the file name of this document.

Where data is not available, please do not collect or estimate it, but mark that it is not available. Where the answer is not known, please indicate this in the extra comments box that is placed after each question.

The timetable is that the tool should be completed and returned to Peter Anderson by e-mail by 30<sup>th</sup> September 2008: [peteranderson.mail@gmail.com](mailto:peteranderson.mail@gmail.com). It is preferable to return the tool if it is 75% to 80% completed, rather than waiting for it to be 100% completed.

If you have any queries, please contact Peter Anderson by e-mail.

---

<sup>2</sup> The tool was first developed in 2004 by Peter Anderson. It has been revised for the European Commission funded PHEPA Project, with assistance from the partners of the Project.

If completing for a region, please state when the answers apply for the country and not the region
